Lannion, January 28, 2019 – 5:35pm

ANNUAL TARGET ACHIEVED WITH RECORD REVENUES OF €100.9M

- Annual revenue growth of 18.5%
- Strong growth maintained in Q4, with revenues up +30.1% to €35.4m

The LUMIBIRD Group, the European leader for laser technologies, passed the milestone of €100m of revenues in 2018, in line with its targets from the start of the year. The three divisions driving the Group’s growth – Lidar, Defense and Medical – all progressed in 2018, with very strong increases for Lidar Sensors and Defense activities in particular.

ANNUAL BUSINESS

Consolidated revenues (unaudited)

For more consistent reporting, the segmentation of the activities has been reviewed to reintegrate the activities relating to the military and space sectors into the Defense division. These were previously included in the Industrial and Scientific division and, to a lesser extent, the Lidar Sensors division.

(1) Proforma information based on the assumption that the QUANTEL/KEOPSYS business combination took place on January 1, 2017.
(2) 2017 revenues redistributed according to the new segmentation.
Industrial and Scientific

Following a slowdown in business at the start of the year due to sourcing delays, the Industrial and Scientific division achieved 1.5% growth in 2018, with revenues of €25.7m, versus €25.3m in 2017. The division’s new scope, which excludes defense and aerospace-related activities, groups together industrial activities, particularly for the flat screen sector, as well as lasers for scientific laboratories, a stable and resilient business.

Lidar Sensors

The Lidar Sensors division closed out the year with revenues of €15.4m, up 33.8%. Business continued to grow in the fourth quarter, generating revenues of €5.3m, driven by very buoyant levels of demand in the wind energy, 3D mapping and autonomous vehicle sectors. Lumbird is continuing to progressively ramp up its production capacity to take this strong demand on board.

Defense / Space

The Defense / Space division grew 56.9% in 2018, generating €26.2m of revenues, compared with a higher basis for 2017 (€16.7m vs €12.6m reported last year) due to the segmentation change. The division achieved record revenues in the fourth quarter, up 115% to €11.8m. The aerospace activities, notably contracts with the European Space Agency (ESA), are now included in the Defense / Space division, and their robust development accounts for part of the increase in revenues. Alongside this, the completion and delivery schedules for the MegaJoule and military contracts generated high levels of billing in the fourth quarter.

Medical

The Medical division recorded €33.6m of revenues in 2018 (+6.3%), with €10.3m in the fourth quarter (+9.8%). Growth is being driven by the success of the major new products launched in 2018, such as the Compact Touch 2, LacryDiag or Supra 810, as well as the extension of the geographical markets covered across the entire range.

Outlook

The strong revenue growth over the second half of 2018 (€58.6m vs €42.3m in H1) will mechanically have a positive impact on earnings for the year. The Lidar Sensors, Defense and Medical sectors are continuing to show buoyant trends, and the Lumbird Group has key positions on them, with competitive, high-performance products and a reputation for quality, all positive factors that will support the Group’s ambition over the coming years. Lumbird is setting itself strategic targets to achieve €150m of revenues (excluding external growth) and an EBITDA margin of over 20% by 2021.

Next date: 2018 full-year earnings on April 2, 2019 (before start of trading)
LUMIBIRD is one of the world’s leading specialists in lasers. With 50 years of experience and a mastering of solid state laser, laser diodes and fiber laser technologies, the Group designs, manufactures and markets high performance lasers for scientific (laboratories and universities), industrial (manufacturing, defense, Lidar sensors) and medical (ophthalmology) markets.

Born from the combination of Keopsys Group with Quantel in October 2017, LUMIBIRD has more than 400 employees and over €100 million of revenues and is present in Europe, America and Asia.
