9. **sets** the validity of the delegation of authority under this resolution for 18 months from the date of this General Meeting's decision,

10. **acknowledges** that this delegation of authority cancels and replaces as of this day and up to the amount of the portion not yet used, if applicable, any prior delegation with the same purpose and particularly the delegation granted by the Company's Extraordinary General Meeting on 3 May 2022 in its 14th resolution.

Twenty-fifth resolution *(Authorization for the Board of Directors to award new or existing free shares to some or all of the employees or corporate officers of the Company or related companies.)*

The General Meeting, having reviewed the Board of Directors' report and the Statutory Auditors' special report, ruling under the quorum and majority conditions for Extraordinary General Meetings, and in accordance with Articles L.225-129-2, L.225-197-1 and L.22-10-59 et seq of the French commercial code:

1. **authorizes** the Board of Directors, with an option to subdelegate under the legal conditions in force, to award, based on its decisions alone, on one or more occasions, existing free shares or free shares to be issued to employees of the Company or related companies or groups under the conditions set out in Article L.225-197-2 of the French commercial code and to corporate officers of the Company or related companies or groups that meet the conditions set by Article L.225-197-1, II of said code,

2. **decides** that the total number of free shares awarded under this authorization may not exceed 10% of the share capital on the day of the Board of Directors' decision. This maximum limit will be increased to 30% of the capital if the award benefits all of the Company's employees, while noting that above 10%, the difference between the number of shares distributed to each employee may not exceed a ratio of one to five,

3. **decides** that:

- (i) free awards of shares to their beneficiaries will become definitive at the end of a vesting period, which may be no less than the period required by the legal provisions applicable on the day of the allocation decision (to date, one year),
- (ii) the shares definitively acquired will be subject, at the end of the aforementioned vesting period, to a holding requirement, which may be no less than the period required by the legal provisions applicable on the day of the allocation decision (to date, one year); however, this holding requirement may be cancelled by the Board of Directors for free shares awarded with a vesting period of at least two years,

4. **decides** that awards will become definitive before the end of the vesting period or, if applicable, the holding requirement, in the event of the beneficiary's disability according to the second or third categories from Article L.341-4 of the French social security code (Code de la sécurité sociale),

5. **acknowledges** that under this authorization, shareholders of the Company expressly waive their preferential subscription rights, to the benefit of the beneficiaries of free share award, for the shares that may be issued under this authorization,

6. **acknowledges** that the Board of Directors has the authority to modify the number of shares awarded, within the aforementioned maximum limit, to take into account the impact of operations on the Company's capital or equity, notably in the event of a change in the share's par value, a capital increase through the incorporation of reserves, profits or premiums, free share awards, stock splits or consolidations, distribution of reserves or any other assets, amortization of the capital, or any other operation concerning shareholders' equity. Shares awarded in connection with such adjustments will be considered to have been awarded on the same day as the shares initially awarded,

7. **acknowledges** that for free awards of new shares to be issued under this authorization, as the shares are definitively vested, the capital will be increased through the incorporation of reserves, profits or issue premiums for the beneficiaries of said shares and shareholders will expressly waive their rights to the fraction of reserves, premiums and profits to be incorporated into the capital to make it possible to pay up the shares awarded,

8. **grants** full powers to the Board of Directors, with an option to sub-delegate as authorized by the law, to implement this authorization, notably with a view to:

- (i) determining whether the shares awarded freely are shares to be issued and/or existing shares,
- (ii) determining the identity of beneficiaries or one or more categories of beneficiaries for share awards from among the employees and corporate officers of the Company or the aforementioned companies or groups, in addition to the number of shares awarded to each one of them,
- (iii) setting the conditions and, if applicable, the criteria for awarding shares, including the minimum vesting period and the holding period required for each beneficiary, under the conditions set out above,
- (iv) if new shares are issued, allocating, as relevant, any sums needed to free up such shares against reserves, profits or issue premiums, acknowledging the performance of capital increases carried out under this authorization, amending the articles of association accordingly and, more generally, performing all formalities.

9. **sets** the validity of the delegation of authority under this resolution for 38 months from the date of this General Meeting's decision,

10. **acknowledges** that this authorization cancels and replaces as of this day and up to the amount of the portion not yet used, if applicable, any authorization with the same purpose and particularly the authorization granted by the Extraordinary General Meeting on 4 May 2021 in its 27th resolution.

Twenty-sixth resolution *(Authorization for the Board of Directors to award stock options to some or all of the Group's employees and corporate officers)*

The General Meeting, having reviewed the Board of Directors' report and the Statutory Auditors' special report, ruling under the quorum and majority conditions for Extraordinary General Meetings, and in accordance with Articles L.225129-2, L.225-177 to L.225-186-1 and L.22-10-56 of the French commercial code:

- 1. **authorizes** the Board of Directors, with an option to subdelegate under the legal conditions in force, to grant, on one or more occasions, for the members of staff that it determines from among the employees and corporate officers of the Company and related companies or groups under the conditions set by Article L.225-180 of the commercial code, options entitling them to subscribe for new Company shares to be issued in connection with an increase in its capital, as well as options entitling them to purchase Company shares from the Company's buybacks under the legal conditions in force,
- 2. **decides** that the stock options awarded under this authorization will not entitle holders to subscribe for or purchase a total number of shares representing more than 10% of the share capital, with this maximum limit determined each time the Board of Directors uses this delegation in relation to the share capital on that date. The shares to be issued for adjustments

to be made in order to safeguard, in accordance with legal and regulatory provisions, the rights of the beneficiaries of options will be added to this maximum limit, if applicable, while noting that this amount is allocated against the overall limit set in the 20th resolution from this General Meeting.

3. **decides** that the price to be paid when stock options are exercised will be set, in accordance with legal requirements, by the Board of Directors on the day when the options are awarded,

4. **decides** that, if the Company carries out one of the operations provided for under Article L.225-181 or Article R.22-10-37 of the French commercial code, the Company will take, under the regulatory conditions in force, the measures required to protect the beneficiaries' interests, notably, if applicable, by adjusting the number of shares that may be obtained by exercising the options granted to the beneficiaries to take into account the impact of this operation,

5. **acknowledges** that under this authorization, shareholders of the Company expressly waive their preferential subscription rights, to the benefit of the beneficiaries of the stock options issued under this authorization, for the shares that will be issued upon exercise of such stock options. The increase in the share capital resulting from the exercising of the stock options will be carried out definitively based on the simple declaration of the exercising of the option accompanied by the subscription forms and payments to pay up the securities, which may be made in cash or through offsetting with receivables against the Company,

6. **grants** full powers to the Board of Directors to implement the present authorization and more specifically to:

- (i) determine whether the options awarded will give a right to subscribe newly issued shares or existing treasury shares of the Company,
- (ii) determine the category(ies) of beneficiaries or the list of beneficiaries of options and the number of options awarded to each of them,
- (iii) set the terms and conditions for the options, notably (i) the validity period for the options, while noting that the options will need to be exercised within a maximum of 10 years, (ii) the date(s) or period(s) for exercising options, while noting that the Board of Directors, if applicable, may (a) bring forward the dates or periods for exercising options, (b) maintain the exercisable nature of the options, or (c) modify the dates or periods during which the shares obtained by exercising options will not be able to be transferred or converted to bearer format, (iii) the potential clauses prohibiting the immediate resale of all or part of the shares, while noting that the period set for holding the securities may not exceed three (3) years from the exercising of the options,
- (iv) if applicable, limit, suspend, restrict or prohibit the exercising of options or the transfer or conversion to bearer format of shares obtained by exercising options, during certain periods or from certain events, while its decision may concern all or part of the options or shares or all or part of the beneficiaries,

- (v) set the dividend entitlement date, even on a retroactive basis, for new shares resulting from the exercising of stock options.

7. **decides** that the Board of Directors will also have full powers, with an option to subdelegate under the legal conditions in force, to acknowledge the completion of the capital increases for the amount of the shares that will be effectively subscribed for by exercising stock options, to amend the articles of association accordingly and, at its sole discretion and if it considers this relevant, to allocate the costs for capital increases against the amount of the premiums relating to these operations and to deduct from this amount the sums required to raise the legal reserve to one-tenth of the new capital after each increase, and to perform all necessary formalities for the listing of the securities issued in this way, to perform all filings with all bodies and to do anything else that may be necessary,

8. **sets** the validity of the delegation of authority under this resolution for 38 months from the date of this General Meeting's decision,

9. **acknowledges** that this authorization cancels and replaces as of this day and up to the amount of the portion not yet used, if applicable, any authorization with the same purpose and particularly the authorization granted by the Extraordinary General Meeting on 4 May 2021 in its 28th resolution.

2. **decides** that the maximum nominal amount of the capital increases that may be carried out under this authorization is set at 1,000,000 euros or its equivalent value in any other authorized currency(s), with this amount allocated against the overall maximum limit set in the 20th resolution from this General Meeting,

1. WHAT HAPPENED IN FISCAL YEAR 2022

1.1. Key events in fiscal year 2022

1.1.1 Activity

After two years (2020, 2021) disrupted by the COVID-19 health crisis and its consequences on the economies of the countries in which Lumibird and its subsidiaries operate, the year 2022 took place in a tense geopolitical context (war in Ukraine) and in a constrained economic context: shortage of optical and electronic components

leading to higher costs as well as a critical lengthening of procurement lead times; inflation unseen for more than 10 years weighing on overheads and personnel costs; higher cost of debt.

In this environment, the Lumibird Group remained agile and pragmatic. It has maintained a high level of activity while laying the foundations for adapting its organisation to new economic, social and societal constraints.

To date, this has resulted in :

- higher structural costs, representing an investment in the future;
- support for its subsidiaries to ensure the financing of stocks, securing supplies and their costs, as well as the financing of new production sites (Ljubljana, Villejust, Göteborg, Lannion) better adapted to short and medium term production needs;
- a still very active M&A approach, aimed at consolidating the Group's strategy in terms of vertical integration.

Over the financial year, the level of activity of 191.0 million euros (+ €28.5 million/+17.5% on a reported basis compared to 2021) generated:

- an EBITDA of €31.3 million (16.4% of revenues), down €1.3 million (-4.0%) compared to 2021;
- a current operating income of €16.4 million (8.6% of revenues), i.e. - 3.4 million euros (-17.2%) compared to the current operating result of last year;
- ~ a net financial debt position of €52.5 million compared to €14.9 million a year earlier, reflecting the Group's investment in securing its supplies and adapting its facilities.

1.1.2 Financial structure

Finally, the Group continues to match the maturity of its debt with that of its operations: the company has put in place 2 lines of 5 million euros each with BPI Financement, both with a 10-year term and a deferred repayment period covering eight quarters, bearing interest at 0.64% and 2.59% respectively, and combined with cash collateral for a total of €0.5 million.

At 31 December 2022, the Group had a net financial debt position of €52.5 million (including a positive net cash position of €61.7 million at less than one year), enabling it to meet its short- and medium-term debt obligations without difficulty.

1.2.1. Revenues

The Lumibird Group's consolidated revenues for 2022 was €191.0m, up 17.5% from 2021 based on reported data. At constant exchange rates⁽¹⁾ it increased by €24.8 million, or 15.2%, to €187.2m.

⁽¹⁾ Considering the rates for FY 2021 applied to revenues for 2022

Revenues (in million euros)	2021 reported	2022 reported	Reported change
First quarter	33.8	38.0	12.2%
Second quarter	41.6	46.1	10.8%
Third quarter	37.2	40.9	10.0%
Fourth quarter	49.8	66.0	32.4%
TOTAL	162.5	191.0	17.5%
Of which Photonics	76.4	93.5	22.5%
Of which Medical	86.1	97.4	13.2%

Group revenues are evenly split between the Photonics (€93.5m) and Medical (€97.5m) divisions.

1.2.1.1. Photonics

For the year, the Photonics division recorded strong growth in Europe (+38%) and the US (+26%), but sales declined slightly in China, where the zero COVID policy has weighed on the economy.

It had the strongest growth in the last quarter, at +49% with sales of €35.3m. The Defence/Space activities, notably supported by the integration of Lumibird Photonics Sweden, recorded sales of €14.6m (+167%) in the quarter, representing 49% of the annual sales of €30.1m (+50%). The Industrial and Scientific activities grew by 30% over the quarter, to €11.1m, for an annual total of €37.4m (+10%). The Lidar business was stable at €9.6m for an annual total of €26.0m (+16%). Lidar systems represent 34% of the Lidar business over the year and are up 42%.

1.2.1.2. Medical

In 2022, the Medical division was more resilient in Asia (+11%), with dynamic growth in the US (+18%) and limited growth in Europe (+5%), marked by the conflict in Ukraine. Annual sales in Ophthalmology were split between direct sales (€50m, +11%) and the distributor network (€47.4m, +15%).

The division recorded stable seasonal growth throughout the year and closed the last quarter up 17% at €30.7m. The division's sales are split between Diagnostics (€8.6m in the last quarter and €23.8m for a yearly total up 28%) and Treatment (€22.1m in the last quarter and €73.7m for a yearly total up 9%).

1.2.2. Current operating profitability

In the difficult economic context described in paragraph 1.1.1, the Group has maintained a high level of activity, in line with its expectations, while intensifying its efforts to secure its development in 2022 and 2023, at the cost of a tightening of its operating margin in 2022.

In 2022, the Group achieved a current operating profit of €16.4 million (compared to €19.8 million a year earlier). This evolution – a decrease of – €3.4 million – can be rationalised as follows:

- Current operating income generated by the new defence range finder business in Sweden + €0.8m;
- Change in gross margin at constant scope linked to growth ⁽¹⁾+ €11.2m;
- Increase in net external expenses ⁽²⁾ –€3.6m;
- Increase in personnel costs ⁽³⁾ –€10.0m;
- Increase in depreciation and amortisation ⁽⁴⁾ –€2.0m;
- Other expenses + €0.1m.

(1) The increase in activity excluding the defence rangefinder business in Sweden (+14.3%) was accompanied by a tightening of margins (from 63.6% to 61.6% overall) due to a rise in procurement costs, particularly in dollars;

(2) The increase in net expenses is mainly due to the efforts to structure the Group (leading to an increase in professional fees) but also to an increase in travel and marketing expenses to make up for the "COVID" years;

(3) The Group's efforts in terms of securing its growth have also mainly focused on strengthening its production, research and development, support and management teams (including top management, already initiated in H2 2021);

(4) The increase in depreciation and amortisation is due to the amortisation of mature R&D projects, which are expected to be fully operational in terms of revenues from 2023 onwards.

1.2.3. Operational profitability

Taking into account a current operating income of €16.4 million over 2022, the Group posted an operating profit of €17.3 million (compared to €19.1 million a year earlier).

The change compared to the previous year (–€1.8 million) is due to :

- The decrease of the current operating income (– €3.4m);
- The recognition of capital gains on asset disposals (Aircraft, Slovenian real estate) +€3.9m;
- The increase in 2022 of costs directly related to M&A transactions – €2.3m.

During 2022, the Group has been active in its M&A activity. In particular, in May 2022, the Group finalised the acquisition of the Saab Group's defence laser rangefinder business and of Innoptics, a company specialising in the encapsulation of electronic components.

1.2.4. Financial result

The financial result for 2022 is –€2.8 million, compared to –€1.5 million a year earlier. This evolution (increase in financial expenses of €1.3 million) mainly reflects :

- The increase in the cost of net financial debt for –€0.9 million, under the combined effect of the increase in the quantum of debt and the interest rate: the average gross debt increases from €100.3 million over 2021 to €113.1 million over the 2022 financial year, when the annualised rate of gross financial debt is 2.96% compared to 2.55% one year earlier;
- The evolution of the foreign exchange gain and losses for –€0.2 million in variation compared to 2021;

1.2.5. Net income

Taking into account the change in operating income on the one hand, the change in financial income and expenses on the other hand, as well as and the tax expense (including deferred tax) which changes in line with the operational profitability, the Group's net income for 2022 came to €11.4m.

1.3. Consolidated balance sheet summary

Extract from the consolidated balance sheet (in million euros)	2021 reported	2022 reported	Change
Non-current assets	164.8	184.9	20.2

Current liabilities	57.9	119.8	61.9
TOTAL LIABILITIES	347.6	372.0	24.4

1.3.1. Non-current assets

Non-current assets are mainly comprised of fixed assets (tangible and intangible – including goodwill – and financial), and tax receivables due in more than one year (mainly the Research Tax Credit and deferred tax assets). Compared to the figures at 31 December 2021 (reported), total non-current assets increased by €20.2 million. This increase can be broken down mainly as follows:

- €0.3 million change in goodwill carried by Lumibird, mainly due to the recognition of provisional goodwill following the acquisition of Innoptics (+ €0.3 million), the impact of change in the pound sterling exchange rate on Halo-Photonics goodwill (–€0.4 million) and the Australian dollar exchange rate on Ellex goodwill (–€ 0.2 million);
- €17.6 million in net tangible and intangible fixed assets, with net investment flows for the period (+€36.8 million) partially offset by asset disposals (–€4.9 million), and depreciation and amortisation charges (–€14.3 million);
- 0.6 million in non-current financial assets, corresponding mainly to cash collateral granted to BPI in connection with the setting up of a financing facility (€0.5 million) and a guarantee on the lease of a new property at the Villejust site (€0.1 million);
- 2.3 million in non-current tax receivables (including deferred tax assets), due on the one hand to the consumption of the tax losses of the French tax group for –€3.4 million and the recognition of new temporary differences for €4.8 million, and on the other hand due to the change in the portion over one year of the Group's research tax credit (€0.9 million).

1.3.2. Current assets

Current assets, excluding cash, came to €125.4 million, up €39.7 million compared to 31 December 2021. This change is mainly due to the increase in inventories for €19.6 million and trade receivables (€16.9 million due to the strong seasonal nature of the business at the end of the year). This results in an increase in working capital requirements (WCR), which is commented in paragraph 1.4.1 of this report.

1.3.3. Shareholders' equity

The change in shareholders' equity (Group share) over the year gives the following breakdown:

Change in shareholders' equity in million euros	Group
Shareholders' equity at 1 January 2022	181.3
Dividend distribution	–
Income– Group share	11.4
Translation differences	–0.4
Actuarial differences	0.5

TOTAL CURRENT AND NON-CURRENT LIABILITIES	108.4	57.9	166.3	58.8	119.8	178.6

Current and non-current liabilities amounted to €178.6 million euros, an increase of +€12.3 million over the year. This change mainly reflects the change in trade payables discussed in paragraph 1.4.1 of this report, and to a lesser extent the change in financial liabilities (+€2.2 million), explained below.

The Group's net financial debt, by nature, is presented and evolves as follows:

Net financial debt in million euros	2021	2022
Debts from credit institutions	63.1	63.0
Bonds	39.5	39.6
Financial lease and lease debts	7.2	9.5

NET FINANCIAL DEBT	14.9	52.5
Of which less than one year ⁽¹⁾	-83.0	3.9
Of which over one year	97.9	48.6

(1) Cash assets are considered to be at less than one year.

The Group's gross financial debt at 31 December 2022 was €114.2 million (i.e. +€2.2 million compared to the gross financial debt at 31 December 2021). This change is mainly due to:

- An increase in financial debts carried:
 - €10 million through 2 lines of €5 million each with BPI Financement for a respective term of 10 years and including a deferred repayment of 8 quarters, bearing interest at a rate of 0.64% and 2.59%, and accompanied by cash pledges for a total amount of €0.5 million;
 - €5.2 million through the setting up of financing backed by the acquisition or extension of real estate complexes (Ljubljana, Lannion);
 - €5.4 million due to the change in the value of the debt resulting from lease contracts (revision of the probable useful life) including a new property lease for €3.5 million for the new Quantel Technologies site in Villejust;
 - €0.6 million due to the evolution of other debts (ICNE, new leasing contract, etc.).
- ~ A decrease in financial debts induced by :
 - €19.2 million by debt repayments (including leases), including the early repayment of loans for the financing of the historic building in Lannion (refinanced elsewhere) and the Lumibird Transport aircraft;

The evolution of the cash flow is commented in chapter 1.4.1 of this report.

It should be noted that the Group's acquisition debt (bank and bond), amounting to respectively €10.5 million and €40.0 million on the Group's balance sheet at 31 December 2022) is subject to two ratios, failure to comply with which will result in the debt becoming payable:

- A **leverage ratio** (ratio of the net consolidated debt to consolidated EBITDA) must not exceed a declining maximum, gradually moving from 3.50 (high limit) at 31 December 2020 to 2.75 (low limit) at 31 December 2026 and for which:

- Consolidated net debt means, on a consolidated basis the difference between:
 - Consolidated cash, representing the active position of cash and cash equivalents accounts;
 - Consolidated indebtedness, the latter designating all borrowings and similar debts excluding all subordinated debts, plus, within the same scope of consolidation, the passive positions of bank accounts, bills discounted and not due, off-balance sheet commitments (excluding pension commitments, guarantees and sureties granted in the context of current operations and interest rate and exchange rate hedges) and assignments of receivables or discounting with recourse or any factoring operation with recourse;
- Consolidated EBITDA is the consolidated current operating income:
 - Increased by net depreciation and provisions;
 - Decreased by other current income and increased by other current expenses.

At 31 December, the Group's leverage ratio was 1.7.

- A **coverage ratio** (ratio of the net consolidated cash flow to the servicing of the debt) which must be greater than one throughout the term of the credit, and for which:
 - The consolidated cash flow consists of the Group's consolidated EBITDA :
 - less :
 - corporate taxes actually paid ;
 - investments disbursed ;
 - change in consolidated net working capital ;
 - any income not expected to be received or paid and included in consolidated EBITDA;
 - any exceptional or extraordinary item (including net proceeds from the sale of assets, shares, company rights or business goodwill) which is not part of current operations and which has been the subject of a receipt or disbursement;
 - increased by :
 - any drawdown of medium-term loans;

- the sum of other interest and financial income from investments and cash and cash equivalents and net income from the disposal of investment securities;
- debt service means the Group's consolidated financial expense:
 - increased by the principal repayment amount of financial debts maturing during the test period under consideration;
 - less any repayment in 2021 of bank loans subject to PGE (state-guaranteed loan) regulations entered into prior to the date of signing the agreement.

Given the record level of activity in the fourth quarter of 2022 (and in particular in December 2022), the Group's working capital requirement at 31 December 2022 is occasionally high. As a result, taking into account the methods of calculating the coverage ratio, at 31 December 2022, the Group had a ratio of -0.2 and did not meet the threshold of 1.

At that date, the Group is therefore in a situation of early repayment of its acquisition debt (bank and bond). In application of the provisions of IAS1, all of the Group's acquisition debt (bank and bond), i.e. €49.9 million (including the calculation of the Effective Interest Rate), has been classified as current financial debt.

Subsequent to the balance sheet date, and prior to the closing of the 2022 financial statements, the Group obtained the agreement of its lenders to waive compliance with the coverage ratio at 31 December 2022, which consequently does not give the €49.9 million reclassified as current financial liabilities an immediate collectability or a maturity of less than 12 months. Furthermore, given the Group's cash flow forecasts, its available cash and additional financing capacities, the Group's liquidity is not in question as at 31 December 2022 and for the next 12 months.

1.4. Cash flow

In 2022, the Group recorded a net cash flow of -€35.6 million. The Group's cash flow statement is presented below:

Cash flow in million euros	2021	2022
Cash flow from operations	26.6	1.4
Cash flow from investments	-28.6	-29.3
Cash flow from financing	18.2	-7.9
Impact of exchange rate variations	0.6	0.2
CHANGE IN CASH	16.8	-35.6

1.4.1. Cash flow from operations

Over the financial year 2022, the Group generates a net cash flow of +€1.4 million from operations; this flow is mainly broken down as follows:

- €30.1 million in operating cash flow before tax and financial expenses, generated by the Group's EBITDA, net of expenses directly related to the scope of consolidation;
- €29.2 million change in working capital requirements (WCR), mainly due to
 - the increase in inventories (€13.6 million), particularly of raw materials, as the Group worked to secure its supplies in order to secure future orders and also bore the cost of components in a context of shortages;

- the increase in trade receivables (€12.9m) and trade payables (€1.6m) due to the seasonal nature of the business in the last two months of the year;
- the increase in other social and tax receivables for €4.3m (notably Research Tax Credit, VAT).
- +€0.5 million in taxes received and paid;

1.4.2. Cash flow from investments

1.4.2.1. Investments carried out

Investments carried out in million euros	2021	2022
Industrial investments	24.0	36.8
Financial investments (excluding acquisitions)	8.3	0.7
INVESTMENTS RECORDED	32.3	37.6
Disbursement on acquired industrial investments	20.1	29.4
Cash from disposals of industrial investments	-1.9	-8.7
Disbursement on acquired financial investments	8.3	0.7
Cash from disposals of financial investments	-	-0.2
INVESTMENTS PAID OUT	26.5	21.3
Acquisition of subsidiaries – Net cash	2.1	8.1

The difference between investments recorded and investments paid out corresponds to:

- Finance leases;
- The impact of disposals of fixed assets;
- The change in the fixed asset supplier item.

For the financial year 2022, the Group's recorded industrial investments amounted to 36.8 million. They mainly concern:

- capitalised development costs for €10.2 million;
- €17.6 million, mainly related to the extension of industrial capacity at the Lannion site, the new Quantel Technologies site, Optotek, and Lumibird Photonics Sweden;
- €5.2 million of new rights of use (through leases), mainly related to the new real estate lease for Quantel Technologies' new site in Villejust;
- miscellaneous equipment (€3.8 million).

1.4.2.2. Ongoing investments

As at 31 December 2022, the amount of ongoing investments recorded is €9.8 million and mainly concern the extension of the Lannion site and the development of the Villejust site.

1.4.2.3. Investments to be made

Apart from the ongoing investments mentioned above, the other planned investments relate to current investments in R&D and manufacturing equipment, it being specified that manufacturing requires relatively very few specific investment.

1.4.3. Cash flow from financing

The Group's financing cash flows stem from:

- Debt (new loans, loan repayments, interest paid):
 - €15.2 million of new bank loans, details of which are provided in section 1.3.4 of this report;
 - The Group repaid its financial debts, either in advance following the disposal of the underlying assets or in

- accordance with the repayment schedule (–€18.8 million);
- The Group incurred €2.9 million of cash financial expenses.

- Other transactions on its shares (free shares, treasury shares) for –€1.4 million.

2. 2022 activity of Group companies

2.1. Result of Lumibird SA

Within the Group, Lumibird SA acts as:

- an entrepreneur for all of the Group's business activities, guiding research, production, and sales activities, and providing management teams, and more generally bearing all expenses linked to the Group's development;
- a main player within the framework of a specific contract linking the Group to a defence developer;
- the main sales subsidiary for laser products in the EMEA zone;
- a financial holding company, bearing equity interests and financial debts. To that end, it handles the financing of its subsidiaries.

A summary of Lumibird's results is presented below:

In million euros	31/12/2021 reported	31/12/2022 reported	Change
Revenues	75.0	84.9	9.9
Operating income	1.3	–0.8	–2.1
Financial income	1.3	2.6	1.3
Extraordinary income	0.2	–3.0	–3.2
Profit sharing	–	–	–
Income tax (including tax consolidation)	1.1	1.7	0.6
NET INCOME	3.8	0.5	(3.4)

Net income was €0.5 million, down €3.4 million. This change can be broken down as follows

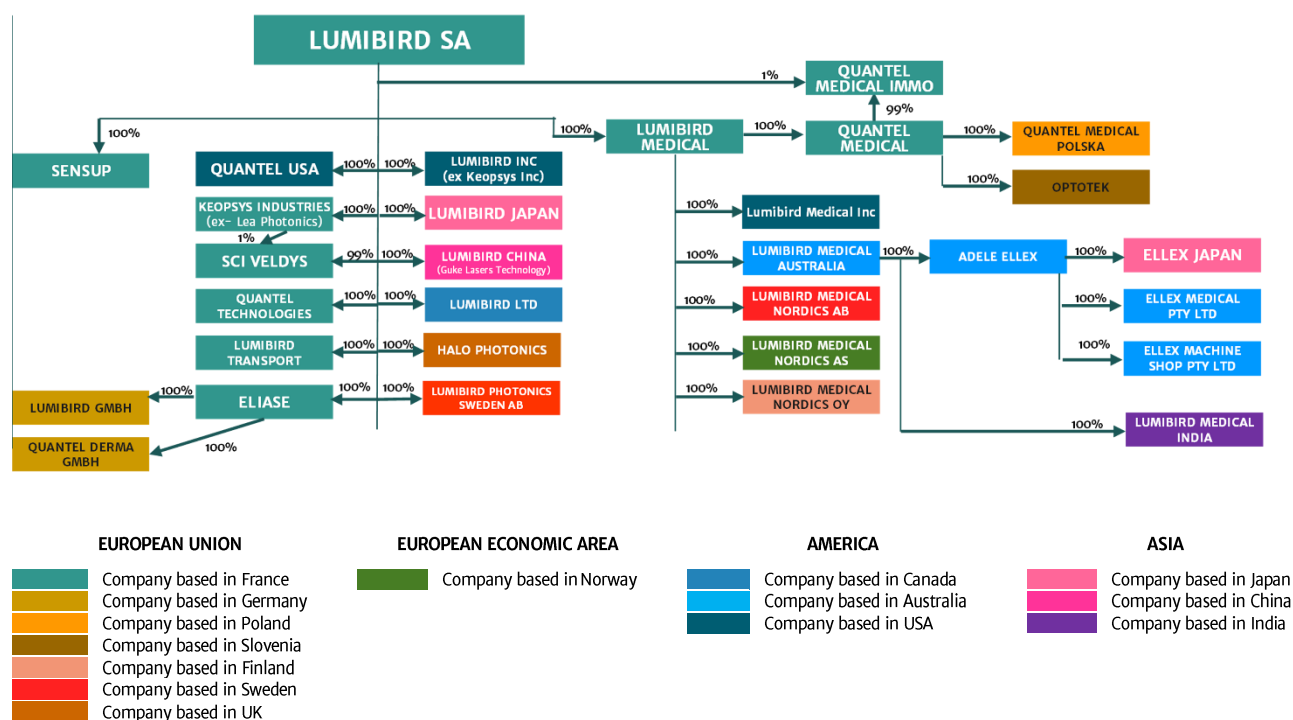

- €2.1 million decrease in operating income: Lumibird SA having undergone a major effort this year in terms of mergers and acquisitions (€1.2 million), and structuring the Group. In addition, as a contractor in the photonics division, Lumibird SA also absorbed the costs of developing factories and deploying sales forces in the marketing subsidiaries;
- +€1.3 million change in the financial result, this change resulting mainly from the management of subsidiaries (in 2021 the Group bore the cost of waiving receivables in favour of some of these subsidiaries for –€2.1 million) and the increase in the cost of debt;
- €3.0 million decrease in extraordinary income:
 - In 2021, the dividends paid by Quantel Medical to its new shareholder (Lumibird Medical) were erroneously recorded at Lumibird SA for €1.5 million. This error was corrected in 2022, and recorded in exceptional income for –€1.5 million;
 - In 2022, the unwinding of the 2019–2021 free share plan led to the recognition, at Lumibird SA, of an exceptional expense of €1.4 million.
- +€0.6 million in tax income, linked to the improvement in the results of the tax consolidation group.

2.2. Subsidiaries' business

2.2.1. Group structure at 31 December 2022

The structure presented above reflects the Group at 31 December 2022. For all the companies presented, the percentage of voting rights is not different from the percentage of capital

The Group's structure aims to reflect the Group's industrial and managerial organization:

For the photonics market:

- The laser production activities are organized around the dedicated production companies:

 - Keopsys Industries**, based in Lannion, France, which houses the design and manufacturing activities for the fiber lasers and fiber amplifiers developed initially by Keopsys and LEA Photonics. LEA Photonics has developed a range of fiber lasers and optical amplifiers for telecoms networks adapted for very long distances, for complex networks in urban environments and for fiber to the home (FTTH). This range uses various components developed and produced in-house that make it possible to guarantee adapted performance features for industrial and medical applications. Keopsys has developed a range of high-power and compact pulsed fiber lasers using components developed and produced in-house and making it possible to guarantee performance features that are particularly well adapted for the LIDAR market, enabling it to become a recognized specialist for LIDAR technologies in the defense, industrial, scientific research and space sectors.

The range of pulsed lasers offered by Keopsys Industries includes:

- Mid-infrared (eye-safe 1.5 micron wave-length);
- Visible wavelength (green) for obstacle detection for the marine sector;
- Ultraviolet for aerosol detection;
- Mid-infrared wavelengths (2 microns and higher) for pollutant detection and defense applications.

Keopsys Industries has put in place high-performance industrial facilities enabling it to manufacture complex products with high volumes and effective cost control.

- Quantel USA**, company registered in Montana, USA, which, in its laser branch, designs nanosecond lasers that complement the lasers produced by Lumibird in Les Ulis.
- Quantel Technologies**, whose production plant is based in Villejust, France, which designs solid-state lasers and laser diodes for industrial and scientific applications and the defense and space sectors.
- The production of LIDAR systems (which uses optical components – fiber lasers and optical amplifiers – developed and manufactured by Keopsys Industries) is supported by the following companies, dedicated to production:

 - Halo-Photonics**, a British company based in Leigh, a purchased company which manufactures Lidar systems to measure wind;

- **Lumibird Ltd**, a Canadian company based in Ottawa, structured around a team of R&D engineers focused on Lidar design work.
- **Sensup**, the company based in Rennes, France, and created in 2013, develops unique and innovative technical solutions with a multidisciplinary team specialized in optics, electronics, mechanics, software and signal processing for a series of compact, long-range and eye-safe LIDARs
- Marketing activities for laser products are now headed up by Lumibird, which manages:
 - The EMEA market directly, or through its subsidiary Lumibird GMBH for after-sales service activities in Germany;
 - The Asian market directly or through its subsidiaries Lumibird Japan (longstanding partner acquired on 24 March 2017) and Lumibird China (created in July 2018; on this market, a local presence and local relationships are key factors for development);
 - The American market, through Lumibird Inc., based in Pennsylvania, comprising technical sales engineers who market the entire laser range and support clients and prospects with defining their needs and the technical responses that can be developed.
- The “Medical” division’s activities are led by Quantel Médical, the subsidiary created in 1994 and based in Cournon d’Auvergne, which designs the ophthalmology products (lasers for treatment and ultrasounds for diagnosis), and markets them through its global network of over 100 distributors. In addition to this distribution network, Quantel Médical is supported by:
 - **Optotek Médical**, a Slovenian company acquired in 2019, specialized in the development of laser and optical solutions for medical applications;
 - **Quantel Medical Inc.**, that sells on the American market, the lasers and ultrasounds manufactured and distributed by Quantel Médical;
 - **Quantel Medical Polska**, a distribution company created in 2018 to serve the Eastern European markets.
 - **Lumibird Medical OY**, **Lumibird Medical AB** and **Lumibird Medical AS**, distribution companies based respectively Norway, Finland and Sweden and serve the Northern European markets;
 - **Ellex Medical Pty** and **Ellex Machine Shop**, Australian companies that develop, manufacture and distribute Ellex product range in Australia.
 - **Ellex Japan (Japan)**, **Lumibird Medical Inc** (merger of Quantel Medical Inc. and Ellex USA), marketing companies in Medical sector that serve Asian markets, and North American markets, respectively.
- In addition, the Group includes the following companies:
 - **Lumibird Medical**, the holding company at the head of the Medical Division, with the task of managing the entire division;
 - **Veldys**, a real estate company (société civile immobilière), which owned the real estate for the Group’s production site in Lannion and sold it to Keopsys Industries in December 2022;
 - **Quantel Médical Immo**, a real estate company (société civile immobilière), which owns the real estate for the

Cournon d’Auvergne production site, which is the headquarters for the Group’s “Medical” business;

- **Quantel Derma GMBH**, previously called Wavelight Aesthetic GmbH. This company, acquired in September 2007, is based in Erlangen near Nuremberg in Germany. Since the Dermatology Division was sold in August 2012, this company no longer has any business and is in the process of being liquidated;
- **Eliase**, incorporated in 2018 in connection with the reorganization operations that took place in 2019, presented in section 1.2 of the management report of the Board of Directors, related to the 2019 fiscal year, and which have not yet recorded any business to date.
- **Lumibird Transports**, incorporated in 2021 but with no activity since the end of 2022 following the disposal of its main asset.

The key figures for Lumibird’s main subsidiaries at 31 December 2022 are presented in the notes to the corporate financial statements, in the section on “equity securities”.

2.2.2. Change in scope over the course of fiscal year 2022

There were no changes in the Group’s scope of consolidation during the past financial year. Saab’s defence laser rangefinder business was acquired on 31 May 2022 by Lumibird Photonics Sweden AB, which was established by the Group during 2021.

In addition, Innoptics, which was acquired by Keopsys Industries in September 2022, was dissolved without liquidation by transferring its assets and liabilities to Keopsys Industries in November 2022.

- Lumibird Medical Australia has set up an Australian tax consolidation group gathering all Australian companies owned 100% directly or indirectly by it.

Lastly, it is reminded that the liquidity agreement entered with ESIRA, the majority shareholder and lead holding company of Lumibird, whose purpose is to assist the Lumibird Group with determining and establishing its overall strategy (approved by the general meeting of 16 December 2019) is still applied. This agreement does not result in compensation.

5. RESEARCH AND DEVELOPMENT ACTIVITIES

The Group continued moving forward with its efforts focused on developing new products and improving existing products.

Total consolidated R&D spending on projects, whether self-financed, subsidized, eligible or not for the Research Tax Credit or equivalent for the 2022 fiscal year, came to 17.1 million euros, with 11.0 million euros capitalized and 6.1 million euros expensed for the current fiscal year.

6. RECENT DEVELOPMENTS AND OUTLOOK FOR THE COMPANY AND THE GROUP

6.1. Post-balance sheet events

On the date of this management report, the Company is not aware of any significant change on the Group's financial position occurring since 31 December 2022.

To the best of the Company's knowledge, there are no disputes, arbitration proceedings or exceptional events following the reporting date that are likely to have or have in the recent past had a significant impact on the financial position, earnings, business, assets and liabilities of the Company or the Group.

6.2. Recent events

In paragraph (1.3.4) of this report, the Group explained the conditions for which the total amount of its acquisition debt (bank and bond), i.e. €49.9 million as at 31 December 2022, has been classified as current financial debt.

Subsequent to the balance sheet date, and prior to the closing of the 2022 financial statements, the Group obtained the agreement of its lenders to waive compliance with the coverage ratio at 31 December 2022, which consequently does not give the €49.9 million reclassified as current financial liabilities in application of the provisions of IAS1 an immediate collectability or a maturity of less than 12 months. In addition, given the Group's cash flow forecasts, its available cash and additional financing capacities, the Group's liquidity is not in question at 31 December 2022 and for the next 12 months.

The major events that have occurred since the beginning of the 2023 financial year, as well as the current and projected economic context, do not alter the Lumibird Group's assessment of the main risks and uncertainties weighing on its activities or its customer risk.

6.3. Strategy

As part of its global strategy, the Group's ambition, reaffirmed through its "2020-2023 roadmap", is to position itself as a leader – both technologically and commercially – in the Photonics and Medical sectors with :

- a strengthened position in the ophthalmology market (diagnostics and treatment), with a strengthened global presence;
- a strengthening of its strategy as an original equipment manufacturer (OEM) for other players in the medical sector;

- a strengthened position in the Lidar sensors markets to keep up with the developments of the autonomous vehicle, wind, and 3D scan markets;
- a strengthened position in the space and defence sectors to keep up with developments of the sector in Europe and North America.

For more information on the Group's business model, the reader is referred to paragraph 1 of the Group's extra-financial performance statement for the year ended 31 December 2022.

6.4. Future outlook and information on trends

Lumibird's markets remain extremely buoyant and capacity building through investments in industrial facilities should support strong sales momentum in the coming half-years.

In this context, the Group is targeting reported sales of €250m in 2023 (including organic growth of 8% to 10% and possible external growth), and a return of the EBITDA margin to a range of 18-23%. In the medium term (to 2026), the objective is to maintain organic growth of 8-10% and to increase the EBITDA margin to 25%.

7. REGULATORY ENVIRONMENT

The Group operates in a complex and evolving regulatory environment. Depending on the division and jurisdiction concerned, the Group may be subject to conditions for obtaining and maintaining authorisations of export or sale authorisations for the Group's laser or medical products. The Group is also subject to increasingly stringent environment regulations in the course of its activities.

7.1. Regulations applicable to the Group's export of laser products

The regulations applicable to the Group's Photonics division essentially require, in some cases, obtaining authorisations from national authorities to export certain components or sensitive Laser systems to third parties or to entities of the Group that are located in countries other than those where the components in question were manufactured.

The main jurisdictions concerned are the European Union and the United States, where the Group manufactured all of its laser products in 2022.

7.1.1 French and European regulations

Some products from the Group's Photonics division that are manufactured in Europe are subject to the European regulations on the export of dual-usage goods, under the scope of (EU) Regulation No. 428/2009 of the Council dated 5 May 2009. For example, some versions of the Group's products MERION, or Q-SCAN fall within Category No. 6 ("Sensors and lasers") of Appendix I to these regulations.

In conformity with the regulations, the Group's export of these products to third-party countries (located outside the European Union) is subject to authorisation from the national authorities (in France, the minister in charge of industry). Sometimes, the authorisation that was requested and obtained by the Group takes the form of a comprehensive license which is valid for exports to one or more specific end users and/or in one or more specific third-party countries.

For France, the procedure to obtain authorisation entails submitting a file to the general corporate office and may take several months.

In addition, some of Sensup's products, relating to laser weapons, are subject to export controls for defense equipment (Article R.311-2 of the French Internal Security Code and Articles L.2335-1 et seq of the French Defense Code) and must therefore also obtain specific authorizations from the French Ministry of Defense and the Directorate General of Armaments for any exports outside the European Union.

7.1.2 US regulations

In the United States, similar arrangements to the European framework apply through the Export Administration Regulations (EAR), which subject exports of dual-use products manufactured in the United States to a system of authorizations based on licenses issued by the US Department of Commerce (specifically the Bureau of Industry and Security within the United States Department of Commerce) depending on the export countries. When the products concerned are low-technology lasers, they may be classified in the "EAR 99" category and exempt from export licenses. This is notably the case for Quantel USA's exports of certain versions of the CFR, DRL and MERION products. For exports concerning certain jurisdictions, such as China, the Group is required to obtain a statement from the client setting out its intentions concerning the product's use and ultimate purpose (End-User Statement).

Furthermore, some products in the Group's "Lasers" division that are manufactured in the United States are subject to the American International Traffic in Arms Regulations ("ITAR"), which are more restrictive than the "EAR" regulations, insofar as they concern American components that are linked to the national defence of the United States. The ITAR notably apply to Quantel USA's export of guidance lasers manufactured and supplied to the Group's French subsidiaries under the scope of the contract with Thales, and for which the Group is required to obtain an export authorisation issued by the United States Department of State.

The American procedures entail filing applications with the competent authorities, and are generally lengthy and costly. The timeframes for obtaining authorisations in the United States are a few months for "EAR" authorisations, three months for so-called "DSP-5 ITAR" authorisations (which relate to product exports), and six to twelve months for so-called "TAA ITAR" authorisations (which relate to the export of technical data).

7.2. Regulations applicable to the Group's sale of medical products

In addition to the rules relating to the export of laser products, the Group is also subject to regulations on the sale of medical products to the public.

In Europe, the products designed and manufactured by the Medical division must comply with the essential requirements of EU Regulation 2017/745 dated 5 April 2017 relating to medical devices, which some of the provisions have been in force since 26 May 2021. These essential requirements primarily concern the safe usage of products by users, and impose obligations on the Group for the testing and transparency of its medical products, before anything is

put on the market, as well as the monitoring of security and traceability of devices post-sale.

In the United States, the Medical division products manufactured and sold by the Group on American territory are systematically subject to the requirement of obtaining an authorisation from the Food and Drug Administration ("FDA"). In almost all cases, there is a simplified procedure known as the "510K procedure," which refers to existing authorisations for products that are considered equivalent. This authorisation procedure requires drafting an application which includes a description of the product and its technical structure, as well as the results of a certain number of tests that ensure the product meets the current technical and safety rules for patients and medical staff. Usually the process takes three months, but any questions posed by the FDA could lengthen that period.

In Australia, DFAT (Department of Foreign Affairs and Trade) imposes strict control on exports to certain countries. For this purpose, Ellex has established an internal process for compliance with these rules. Certain countries are under embargo, while others require an authorisation to be obtained.

Lastly, the Group's Medical division products are also subject to international technical standards that allow the products to be certified. The main requirements are detailed under Medical Standard IEC No. 60601-1 and supplemented by other specific standards relating to the category of medical product (for example, Medical Standard IEC No. 60601-2-22 for lasers). Furthermore, as designer and manufacturer of medical products, the Medical division also has an obligation to comply with the organisational provisions of standard ISO 13485, regarding the requirements of quality management systems (QMS), and those relating to MDSAP (Medical Device Single Audit Program) for the sale of products in the United States, Canada, Brazil, Japan, and Australia.

7.3. Environment regulations applicable to the Group's products

During the course of its business, the Group is required to comply with certain regulations on environmental protection, in particular those controlling the use, storage, or release into the environment of chemical or hazardous substances used to manufacture laser products. The main texts that apply to this subject area are (EU) Directive (UE) No. 2011/65 of the European Parliament and the Council of 8 June 2011 (the so-called "RoHSS" directive), amended by Directive (EU) 2015/863 of 31 March 2015 whose provisions are applicable from 22 July 2019 for the Photonics division products and on 22 July 2021 for the Medical division products, and (EC) Regulation No. 1907/2006 of the European Parliament and the Council of 18 December 2006 (the so-called "REACH" regulation) amended by Regulation No. 2021/979 of 17 June 2021, in the European Union, as well as the Chinese ACPEIP (Administration for the control of pollution caused by electronic information products) from 2006.

The Group is moreover required to comply with the obligations to collect, dismantle, and recycle end-of-life electrical components, per (EC) Directive No. 2002/96 of the European Parliament and the Council dated 27 January 2003.
